Comment: Rhode Island's child count has decreased by 11.34% due to various impacts of the COVID-19 pandemic. One of RI's top referral sources are from parent self-referrals. These are typically due to outside entities suggesting that a parent self-refer, primarily pediatricians and childcare centers. During this time, visits to pediatrician offices significantly declined and childcare centers were closed for two months, with only limited spots available upon re-opening. An analysis of recent referral data indicates that current referral rates are returning closer to 2019 numbers, and in turn, RI expects its child count to return to 2019 numbers by the end of CY21.
