Purpose and Goals of RI Health Care System Planning Initiative

Overarching Goal: High-quality, affordable, equitable, accessible, culturally and linguistically appropriate health care system

The HCSP will be developed through a comprehensive planning process that:

- Applies quality data for actionable health care policy, oversight, and accountability
- Engages a broad and inclusive group of stakeholders, including residents/health care consumers
- Coordinates with other health and human service systems to ensure continuity of care, supportive service delivery and basic needs
- Aligns current and future needs
- Is overseen by the Health Care System Planning Cabinet (HCSP Cabinet) with the support and cooperation of all departments, offices, boards and agencies

Health Care System Planning Goals

- Ensure **solvency** of the health care system
- Foster an **integrated delivery system that coordinates care** across the health care continuum focused on population health, care transitions, and patient-centered care
- Ensure **access to affordable, quality, easy to navigate, and comprehensive care**
- Ensure **health equity and reduce disparities** in access and outcomes
- Incentivize **investments in system transformation** to promote innovation
- Strengthen **preventive, and primary physical & behavioral health services** to maintain appropriate utilization & promote efficiencies
- Invest in efforts to address the **social factors that impact health**
- Establish state infrastructure to **oversee health system performance**, improvement, and equity, as well as promote transparency
