Beginning October 1, 2015, providers will need to determine the version of ICD coding to use when submitting claims to RI Medicaid for payment.

- For dates of service prior to October 1, 2015, ICD-9 must be used.
- For dates of service on or after October 1, 2015, ICD-10 must be used.
- Some claims may span the October 1 implementation date, such as an inpatient hospital stay from 9/28 to 10/5.

The chart below will help providers determine the version of ICD coding to use, for the claim date(s) of service.

Selecting ICD Version

The version of ICD is determined by the date(s) of service, not submission date.

ICD 9 — When date of service is prior to 10/1/15

ICD 10 — When date of service is on or after 10/1/15

To — For inpatient claims with a date span, use the "to" date of service to determine version

From — For all other claims with a date span, use the "from" date of service to determine version
